Coolant/Filtration  
Packages!*

## **The Superior Chip Removal And Coolant Cleaning System**

The Mayfran ConSep 2000<sup>®</sup> is an advanced chip removal/cleaning to handle a multitude of metal chip types including the more difficult to handle strings and turnings. High pressure coolant options allow you to choose a custom high pressure/filtration package to meet your needs.

### *ConSep 2000 Standard Features:*

- No risk—Handles all chip types and material sizes
- Unique design protects filter drum from larger scrap and tramp metal
- Permanent self-cleaning filter media with backwash spray
